

TETP-900 - Multi-Function Cable Tester Tone & Probe Kit - Data Sheet

The TETP-900 is a multifunction cable tester toner and probe kit. Ideal for VDV (Voice Data Video) professionals in telecommunications. This is a multi-function cable tester for RJ45 LAN cable, BNC & F coaxial cable, 6P2C/4P2C jacks and provides tone generation. The kit consists of:

- TET-700 multifunction cable tester and toner
- TEP-200 tone tracing probe
- TET-6 accessory pack
- Two 9V batteries

The TET-700 multifunction cable tester is used to test continuity on RJ45 cables, BNC & F connectorized coaxial cables and other non connectorized cables; it also provides tone via the RJ45 and BNC connectors as well as the test clips. The TET-700 provides Talk power to a telephone for testing. The TET-6 accessory kit is included with the TET-700, it includes:

- (2) BNC to F connector adapters
- (1) 50 ohm BNC terminator
- (1) Belt Clip
- (1) BNC cable jumper
- (1) F connector Jumper (1) RJ45 cable jumper

The TEP-200 tone tracing probe has a plastic probe tip to prevent accidental shorts. The probe is used to detect a tone which is emitted from the internal speaker. The TEP-200 probe also includes a signal strength LED for visual indication of signal strength. The TEP-200 tone trace probe can also check polarity of many 6P2C/4P2C telephone jacks.

SPECIFICATIONS

Includes	Cable tester, tone tracing probe, (2) BNC male to F female connectors, BNC cable terminator 50 ohm, RJ45 jumper, Two 9V batteries, Nylon bag, belt clip, & user's manual
Weight	1.433 lbs
UPC No.	811490016750
